ALLOWANCE

This action is in response to Applicant's amendment filed on 6/29/2009. Claims 25-29 are added. Claims 3-6, 11-14, 17, 19, and 24 are amended. Claims 1, 2, 7-10, 15, 16, and 18 are cancelled. Accordingly, claims 3-6, 11-14, 17, and 19-29 are presented for further examination. Claims 3-6, 11-14, 17, and 19-29 are allowed.

The following is an examiner's statement of reasons for allowance: independent claims 20 and 25 disclose a method and proxy server for transmitting a data block having a fixed preconfigured size to authenticated users based on an access policy. These claims are distinguished over the prior art of record because they delineate the specific steps of establishing a set of usage rights based on the user's access policy, encrypting a received data block, placing the encrypted received data block and established usage rights within a packet, and sending the packet, over a secure channel to a client module that is interposed between an application layer and an operating system kernel layer.

As indicated in the previous Office actions, while prior art methods disclose the separate steps such as allowing for transmission of data blocks based on an access policy, encrypting a data block, placing the data block and usage rights in a packet, and transmitting the packet to a client module that is interposed between an application layer and an OS kernel, these prior art methods do not disclose the combination of these steps nor do they give any indication that it would have been obvious to have combined the prior art to create a method performing all of the claimed steps.

Claims 3-6, 11-14, 17, 19, 21-24, and 26-29 are allowed due to their dependency on the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Hall et al, U.S. Patent No. 5920861;

Brown et al, U.S. Patent No. 6658415;

Medina et al, U.S. Patent No. 6959288;

Chan, U.S. Patent No. 7464162.
